Statement of CCB Standards Validation

Rimba Raya Biodiversity Reserve Project

Validation Scope

The SCS Greenhouse Gas Verification Program has conducted a validation of the Rimba Raya Biodiversity Reserve Project in Central Kalimantan, Borneo, Indonesia against the requirements of the Climate Community Biodiversity (CCB) Project Design Standards, Version 2.0 (December 2008). SCS conducted both desk and field based assessment activities in its evaluation of the project. SCS used the Project Design Document supplied by InfiniteEARTH as the basis for its evaluation.

Validation Opinion

Based on the results of our validation activities, it is our opinion that the project meets the quality standard defined by CCBA. The Rimba Raya Biodiversity Reserve Project conforms to the 14 Required CCB Criteria. The project also conforms to a total of all three of the Optional CCB Criterion qualifying the project for Gold Level in the Community, Climate or Biodiversity categories.

Validation Date: October 14, 2011

Validation Expiration Date: October 13, 2016
